

English for the Profession

Models of Communication ,Types of Communication, Stages of Writing

Jene Paul Gedang, MAEd
Faculty, College of Arts, Sciences and Education

Learning Objectives

- Analyze different **communication models** and their applications
- Differentiate **verbal and nonverbal** communication in business settings
- Explain and apply the **stages of the writing process**

Scenario : John is a newly hired administrative assistant. His supervisor asked him to send an email to the marketing team about the monthly meeting.

Email:

Subject: Meeting

Hi everyone,

The meeting is moved. Please come later because the boss changed it. Bring the stuff we talked about. Don't be late this time because we really need everything finished ASAP.

Thanks.

What went wrong in this communication?

Confusion

Clarity

Completeness

Tone/Courteous

Subject: Rescheduled Marketing Team Meeting – July 31, 2026,
at 3:00 PM

Dear Marketing Team,

Please be informed that our monthly marketing meeting has been rescheduled to Friday, July 31, 2026, at 3:00 PM in the Conference Room. Kindly bring your monthly sales reports and campaign updates for discussion. We would appreciate your punctuality to ensure that we complete the meeting on schedule.

If you have any questions, please let me know.

Thank you.

Best regards,

John Cruz

Administrative Assistant

What is Communication?

Definition

Communication is the **exchange of information** to achieve mutual understanding among individuals.

Components

Key components include sender, message, channel, receiver, feedback, context, and noise.

Importance

Effective communication is **crucial** for teamwork, problem-solving, and building strong professional relationships.

Importance of Communication Models

Studying communication models is essential as they help us understand how messages are conveyed, identify barriers to effective communication, and ultimately enhance our abilities to articulate ideas in professional settings.

Linear Model

Shannon-Weaver Model

Developed in 1949, the Shannon-Weaver Model is a foundational communication theory that illustrates how messages are transmitted from sender to receiver, incorporating potential noise in the process.

Key Components

This model identifies essential components such as the sender, message, channel, receiver, and feedback, highlighting the importance of each element in achieving effective communication.

One-Way Communication

It emphasizes a one-way communication flow, where the sender transmits information without immediate feedback, making it crucial for understanding limitations in traditional communication methods.

Shannon-Weaver Model of Communication

Shannon-Weaver Model in Action

This model illustrates a **real-world scenario** where a manager sends an email to an employee. Factors like poor internet connection and unclear wording can create noise and hinder effective communication.

Interactive Model

Osgood-Schramm Model

The Osgood-Schramm Model emphasizes **two-way communication**, highlighting the feedback loop. It demonstrates how both sender and receiver actively participate in interpreting messages for effective understanding.

Feedback Loop

The feedback loop is crucial in this model, as it allows sender and receiver to clarify messages, ensuring comprehension and reducing miscommunication in professional interactions.

Continuous Communication

This model illustrates that communication is not merely a one-time exchange. Instead, it's a **dynamic process** where both parties are engaged, enhancing relationships in business settings.

Osgood-Schramm Model

Engaging in Two-Way Communication

In this interactive model, a teacher poses a question, a student responds, and the teacher provides feedback. This **dynamic exchange** fosters a deeper understanding and continuous dialogue among participants.

Transactional Communication Model

Barnlund's Model

Barnlund introduced the **Transactional Model** in 1970, emphasizing that communication is a simultaneous and dynamic process between participants, influenced by context and relationship.

Simultaneous Interaction

This model highlights that both participants send and receive messages at the same time, creating a more interactive and fluid communication experience vital for effective dialogue.

Context Factors

Key elements such as culture, environment, and relationships significantly shape how messages are interpreted, demonstrating that communication is deeply embedded in social contexts.

Barnlund's

Transactional Model of Communication

Comparing Communication Models

Understanding Different Communication Approaches

Linear Model

The Linear Model represents a **one-way communication** pathway where information flows from the sender to the receiver without feedback, making it straightforward yet limited in engagement.

Interactive Model

The Interactive Model introduces **feedback** from the receiver, allowing for a more dynamic exchange where both parties can clarify and refine their understanding of the message.

Transactional Model

The Transactional Model emphasizes simultaneous communication, where both sender and receiver continuously exchange messages, influenced by context, culture, and personal experiences, making it highly interactive.

Mini Activity: Poll

In this activity, you will engage with your peers by selecting the most appropriate communication model for various platforms. Your insights will enhance our understanding of effective communication.

Which communication model fits best?

Linear

Interactive

Transactional

Check your understanding

Which communication model fits best?

In this activity, you select the most appropriate communication model for various platforms. Your insights will enhance our understanding of effective communication.

- 1 The CEO delivers a prerecorded video announcing the company's new workplace policies to all employees.
- 2 A customer asks a sales representative about a product, and the representative immediately answers the questions.
- 3 Two project managers discuss deadlines during a meeting while observing each other's tone of voice and facial expressions.
- 4 A professor records a lecture and uploads it to the learning management system for students to watch later.
- 5 During a job interview, both the interviewer and applicant exchange questions, answers, and nonverbal cues throughout the conversation.

Check your understanding

Which communication model fits best?

In this activity, you select the most appropriate communication model for various platforms. Your insights will enhance our understanding of effective communication.

- 6 A company sends an email newsletter to all employees without expecting an immediate response.
- 7 Two coworkers brainstorm ideas for a marketing campaign while building on each other's suggestions.
- 8 A radio station broadcasts the morning news to thousands of listeners.
- 9 A supervisor asks an employee about the progress of a report, and the employee provides updates and receives further instructions.
- 10 A flight attendant demonstrates the airplane safety procedures before takeoff while passengers quietly watch.

Types of Communication

- **Verbal Communication:** Involves spoken or written words to convey messages.
- **Nonverbal Communication:** Utilizes body language, facial expressions, and gestures.
- **Visual Communication:** Uses images, charts, and graphs to illustrate ideas.

Understanding Verbal Communication

Verbal communication encompasses both **spoken and written forms**. It includes emails, reports, and presentations, emphasizing the importance of clarity and professionalism to convey messages effectively in business settings.

Mixed Signals in Communication

Verbal and nonverbal cues can **convey different messages**. An employee saying "I'm okay" while displaying closed body language can create misunderstandings about their true feelings and state of mind.

The Importance of Good Writing

Good writing is **essential for success** in professional settings, as it builds credibility, prevents misunderstandings, and enhances professionalism, ultimately creating opportunities for advancement and collaboration in the workplace.

The Writing Process

Prewriting

This initial stage involves brainstorming ideas, understanding the audience, and organizing thoughts to set a strong foundation for effective communication in writing.

Drafting

During drafting, writers translate their organized ideas into a coherent text, focusing on content rather than perfection, allowing creativity to flow freely without self-editing.

Revising

Revising is critical; it involves evaluating the draft for clarity and coherence, improving structure, and refining arguments to enhance the overall quality of the written work.

Editing

In the editing stage, writers focus on correcting grammar, punctuation, and style errors, ensuring that the document is polished and ready for final presentation or publication.

Prewriting Steps for Success

- Brainstorm ideas to generate relevant content and themes
- Know your audience to tailor your message effectively
- Determine purpose to focus your writing and engage readers

From Drafting to Publishing

The **writing process** involves drafting, revising, editing, and publishing. Each stage is essential for creating clear, effective communication that resonates with the reader and maintains a professional tone.

Crafting Clear and Concise Sentences

Effective sentences are **essential** for professional communication. They should be clear, concise, complete, and correct, ensuring the message is easily understood by the audience and conveys professionalism.

Crafting Clear and Concise Sentences

Example 1: Executive Updates

- Ineffective: An investigation into the data breach is currently being conducted by our security personnel, and updates will be provided as they become available.
- Effective: "Our security team is investigating the data breach and will share updates soon."
 - Why: It eliminates passive phrasing ("being conducted by") and names the responsible team upfront.

Crafting Clear and Concise Sentences

Example 2: Client Pitch & Sales

- Ineffective: Our product is utilized by clients for the purpose of achieving a optimization of their daily workflow schedules.
- Effective: "Our software optimizes daily workflows."
 - Why: It replaces the clunky corporate filler "utilized... for the purpose of" with one powerful verb ("optimizes").

Crafting Clear and Concise Sentences

Example 3: Internal Team Request

- Ineffective: It would be greatly appreciated if you could review the attached financial report and give your approval by the end of the day.
- Effective: "Please review and approve the attached financial report by 5:00 PM."
 - Why: It switches from a timid, wordy request to a polite but authoritative, time-specific directive.

Developing Effective Paragraphs

A well-structured paragraph includes a **clear topic sentence**, supporting details that expand on the idea, and a closing sentence to reinforce the main point, ensuring coherent communication in writing.

Developing Effective Paragraphs

What's wrong with this paragraph?

“Our team needs to improve customer satisfaction scores next quarter because they dropped by 15%. We also need to look into new software tools because the current CRM is slow. John thinks we should hire more support staff, but HR says the budget is frozen. Customers are complaining about long hold times on the phone. We should also update our training manual soon.”

Developing Effective Paragraphs

Better version:

"To reverse last quarter's 15% drop in customer satisfaction, we must immediately reduce phone hold times. Customers frequently cite long wait periods as their primary frustration. To solve this, we will reallocate two team members to peak-hour phone support starting Monday. Streamlining this initial touchpoint will stabilize our scores while we evaluate long-term CRM software upgrades."

Developing Effective Paragraphs

The "MEAL" Framework for Perfect Paragraphs

To write strong paragraphs consistently, structure them using these four steps:

- M - Main Idea: State the central point of the paragraph in your very first sentence.
- E - Evidence: Provide a fact, statistic, or specific example that proves your main idea.
- A - Analysis: Explain why the evidence matters or how it links back to your main point.
- L - Lead-Out: Wrap up the thought and transition smoothly into the next paragraph.

Writing a Cover Letter

Essential components for a successful letter

Key Elements

A cover letter should include your contact information, the employer's details, and a polite greeting to establish a professional tone from the beginning.

Structure

Organize your cover letter with a clear introduction, body paragraphs detailing your qualifications, and a closing statement to reinforce your interest in the position.

Personalization

Tailor each cover letter to the specific job, using keywords from the job description to demonstrate your relevant skills and enthusiasm for the role.

Assessment Rubric

Criteria for Evaluating Your Writing

Format

The format adheres to professional standards, including appropriate font size and spacing, ensuring the document is visually appealing and easy to read.

Content

Content must be relevant and comprehensive, demonstrating a clear understanding of the subject while addressing all key points to meet assignment expectations effectively.

Grammar

Proper grammar usage is essential, including correct punctuation and sentence structure, to communicate ideas clearly and professionally throughout the document.
